InCommand Mitiga

Competitive position & gap analysis — where we stand, by system

vs the market · marks reflect public / vendor-stated capability

DRAFT for planning
15 October 2026

Capability	D4H	WebEOC	Veoci	Noggin	FirstDue	Hexagon	Everbr.	Sysman	MITIGA	Priority
JOC — Disaster management / command										
Digital ICS forms	✓	✓	✓	✓	◐	–	–	◐	✓	WIN
Linked / auto-populating forms	✓	✓	◐	✓	–	–	–	–	◐	ESSENTIAL
Pre-plan one-click activation (dormant events)	✓	◐	✓	◐	✓	–	–	–	✓	WIN
Common operating picture (live map)	✓	✓	✓	✓	✓	✓	◐	✓	✓	parity
Resource requests & status	✓	✓	✓	✓	◐	◐	–	◐	✓	parity
Mutual-aid cross-jurisdiction sharing	◐	✓	◐	◐	–	◐	–	–	☆	SHOULD
SITREP / briefings	✓	✓	✓	✓	◐	–	–	◐	✓	WIN
Tasks / status boards	✓	✓	✓	✓	◐	◐	–	◐	✓	parity
Personnel · roster · readiness · fatigue	✓	◐	◐	◐	✓	◐	–	◐	✓	WIN
Finance / cost tracking	◐	◐	✓	✓	◐	–	–	–	☆	ESSENTIAL
Demobilisation · closure · after-action	✓	✓	✓	✓	◐	–	–	–	☆	ESSENTIAL
Live field video (bodycam) + RoIP listen-in	–	◐	–	–	–	◐	–	◐	✓	WIN
Public warning / mass alerting (CAP, red zones)	–	◐	◐	◐	–	–	✓	◐	☆	ESSENTIAL
No-code board / workflow / dashboard builder	◐	✓	✓	✓	–	–	◐	–	◐	SHOULD
Exercise / training / drill mode	✓	✓	✓	✓	–	–	–	–	☆	SHOULD
Analytics / dashboards	◐	✓	✓	✓	◐	✓	◐	◐	✓	parity
CAD — Call-taking & dispatch										
Call-taking & caller history	–	–	–	–	–	✓	–	✓	☆	ESSENTIAL
Speech-to-text call summary	–	–	–	–	–	◐	–	–	☆	SHOULD
Map plotting & caller location (ANI/ALI)	–	–	–	–	–	✓	–	✓	☆	ESSENTIAL
Unit recommendation & dispatch board	–	–	–	–	–	✓	–	✓	☆	ESSENTIAL
NG911 / E911 integration	–	–	–	–	–	✓	–	◐	–	FUTURE
Radio / RoIP integration	–	–	–	–	–	◐	–	✓	☆	SHOULD
Risk, planning & mitigation										
Floor / site-plan (DXF / AutoCAD) ingestion	–	–	–	–	◐	–	–	–	◐	WIN
Fire & life-safety survey & markers	◐	–	–	–	✓	–	–	–	◐	parity
GIS hazard layers (flood / fire / imagery · ArcGIS)	–	✓	◐	◐	✓	✓	–	◐	☆	ESSENTIAL
Community risk / pre-incident planning	◐	–	–	◐	✓	–	–	–	◐	parity
Business continuity / COOP planning	–	✓	✓	✓	–	–	–	–	–	SHOULD
Cross-cutting (platform)										
Integrated CAD + EOC + Risk (one platform)	–	–	–	–	–	–	–	◐	✓	WIN
SA localisation (lang · census · SAWS · load-shedding)	–	–	–	–	–	–	–	◐	✓	WIN
Offline-first resilience (per node)	◐	✓	◐	✓	–	–	–	◐	◐	ESSENTIAL
Vehicle + asset tracking (bundled)	◐	–	–	–	–	–	–	◐	✓	WIN
Mobile field app	✓	✓	✓	✓	✓	✓	✓	◐	◐	SHOULD
API / interoperability (CAP · EDXL · Esri)	◐	✓	✓	✓	◐	✓	◐	◐	☆	SHOULD
Security / accreditation (POPIA · ISO · SOC2)	◐	✓	◐	✓	◐	✓	✓	◐	☆	FUTURE

Marks: ✓ has it ◐ partial – none / n-a ☆ us: to build **Priority:** ESSENTIAL SHOULD FUTURE WIN parity

JOC — strongest pillar

We match or beat the EOC incumbents on forms, pre-plans, COP, SITREP, readiness — and lead on live field video + RoIP. **Build:** linked forms, Finance/cost, demob+closure, public warning.

CAD — greenfield

Dispatch depth lives with Hexagon & Sysman (SA). We build the essentials: call-taking, caller history, location plotting, unit/dispatch board. RoIP via Ground. **Build:** the whole module, Phase 1.

Risk — half-built edge

SSM floor-plan engine is a real differentiator; First Due leads on GIS. **Build:** ArcGIS hazard layers (flood/fire/imagery) — biggest single gap; it sells the product on sight.

Cross-cutting — the moat

Integrated 3-in-1, SA localisation, bundled tracking = things no competitor has. **Protect & deepen:** offline-first resilience (mission-critical), interoperability (CAP/Esri).

Hexagon column = CAD/dispatch depth (Motorola / CentralSquare comparable). Sysman = local SA competitor (strong on radio/VoIP + off-the-shelf integration, weaker on software depth). EOC columns (WebEOC / Veoci / Noggin) are command-only — none can take a call, dispatch, or run a risk survey. No competitor spans all three systems.
